

Matthew E. Levine

CONTACT INFORMATION	California Institute of Technology Computing and Mathematical Sciences 1200 E. California Blvd. M/C 305-16 Pasadena, CA 91125	<i>E-mail:</i> mlevine@caltech.edu <i>Skype:</i> mattlevine3
RESEARCH INTERESTS	Machine learning, data assimilation, dynamical systems, Bayesian statistics, bio/physiologic modeling	
EDUCATION	California Institute of Technology , California, CA, USA 2018 — Present Computing + Mathematical Sciences, Ph.D. Student (2nd year) Adviser: Dr. Andrew Stuart Columbia University , New York, NY, USA 2011 — 2015 B.A. Biophysics, May 2015 SIT World Learning Study Abroad , Arica, Chile Fall 2015 Program: Public Health, Traditional Medicine, and Community Empowerment	
AWARDS	<ul style="list-style-type: none">• Best Paper of the Year on AI in Health 2019 <i>International Medical Informatics Association Yearbook of Medical Informatics</i> Albers <i>et al.</i> Mechanistic machine learning: how data assimilation leverages physiologic knowledge using Bayesian inference to forecast the future, infer the present, and phenotype. JAMIA 2018.• Finalist (1 of 5, Team T2D2), Amazon Alexa Diabetes Challenge 2017• Poster Competition Winner, Data Science Institute, Columbia University 2016• Summer Chemistry Fellow, Societe de Chimie Industrielle 2012• National Merit Scholar, Johnson & Johnson Consumer Companies 2011	
RESEARCH EXPERIENCE	California Institute of Technology , Pasadena, CA, USA <i>Graduate Student</i> , Computing + Mathematical Sciences Fall 2018 to Present Adviser: Dr. Andrew Stuart <ul style="list-style-type: none">• Designing novel data assimilation framework that uses machine learning to account for model error• Implemented novel state-space constraints in an Ensemble Kalman Filter, which performs a constrained state-update via quadratic optimization (<i>Inverse Problems 2019</i>).• Developing modeling and forecasting methodologies for glucose prediction in critically ill patients in Neurological Intensive Care Units. Columbia University , New York, NY, USA <i>Research Associate</i> , Biomedical Informatics June 2015 to August 2018 Advisers: Dr. George Hripcsak, Dr. David Albers, Dr. Lena Mamykina <ul style="list-style-type: none">• Implemented and validated non-linear stochastic filtering, Bayesian inverse framework, model averaging, and optimization methods for a <i>currently deployed personalized blood glucose prediction mobile application</i> for people with type 2 diabetes.• Collaborated with social scientists and mobile app developers to ensure successful deployment of the data assimilation technology into mobile applications for use among patients in clinical research studies.	

- Developed and evaluated novel methods for time series analysis of non-stationary large-scale electronic health record data, including temporal reparameterizations, linear temporal interpolations, and granger causality. (Levine *et al.* JBI 2018)
- Developed open-source code for evaluating information loss and gain when mapping between medical terminologies, which was shared with an international consortium of medical record stakeholders (totaling over 1 billion patient records)
- Mentored two first-year graduate students in behavioral phenotyping projects that used machine learning and self-monitoring data to make personalized recommendations regarding nutrition, sleep, and activity patterns, as well as visually represent these data such that care providers can understand and recognize intra-patient patterns.
- Contributed talks to weekly Data Mining reading group, and presented on classical results from signal processing, machine learning, informatics, and diabetes physiology

INVITED WORKSHOPS

Mathematisches Forschungsinstitut Oberwolfach, Oberwolfach, Germany
 Invited Participant, *Data Assimilation: Mathematical Foundation & Applications* **April 2020**

Berlin Mathematical School, Zuse Institute, Berlin, Germany **August 2019**
 Participant, *Summer School: The Mathematics of Deep Learning*

- Studied modern theory of neural networks, including their generalizability, expressivity, and applications. Invoked tools from stochastic analysis, dynamical systems, and control to understand neural network properties.
- Poster: mechRNN—embedding mechanistic dynamics within recurrent neural networks.

Alan Turing Institute, London, UK **December 2018**

Data Study Group Participant, *MedImmune Challenge — Machine learning for enhanced understanding in cell culture bioprocess development*

- Developed supervised time-series forecasting approach for predicting drug production quantity in bioreactors.

North Carolina State University, Raleigh, NC, USA **July 2016**

Research Training Group in Mathematical Biology

Participant, *Tutorial Workshop on Parameter Estimation for Biological Models*

- Covered estimation of model parameters and associated uncertainties, parameter identifiability, and uncertainty quantification. Lectures were accompanied by hands-on MATLAB exercises.
- Poster: Online state and parameter estimation for personalized, nutrition-based, real-time glucose forecasting in Type 2 Diabetes. Levine ME, Albers DJ, Stuart A, Mamykina L.

Mathematisches Forschungsinstitut Oberwolfach, Oberwolfach, Germany

Participant, *Data Assimilation Seminar: The Mathematics of Connecting Dynamical Systems to Data* **May 2016**

- Introduction to mathematical and algorithmic foundations of modern data assimilation methods with Bayesian underpinnings.
- Poster: Data Assimilation for Personalized Blood Glucose Forecasting for People with Diabetes. Levine ME, Albers DJ, Stuart A.

SERVICE & OUTREACH

Mission Unstoppable (TV Show), Los Angeles, CA

STEM communication consultant

April 2019 to Present

- Collaborating with a new TV series dedicated to inspiring young girls to pursue STEM careers.
- Using personal and professional connections to highlight women and minority voices in STEM.
- Drafting accessible explanations of fun physical phenomena
- Collaborate with creative content developers to ensure segments are both captivating and accurate

New York Academy of Sciences, New York, NY

STEM mentor

March 2017 to June 2017

- Led a group of seventh-graders at KIPP STAR College Prep Middle School in a once-a-week afterschool exploration of computer programming using a curriculum adapted from

PlayCodeMonkey.org.

Observational Health Data Sciences and Informatics (OHDSI)

Symposium Planning Committee

2015 — 2016

- Supported symposium scheduling, communications, logistics, and funding outreach initiatives

Columbia University Office of Residential Programs, New York, NY

Residential Advisor

2012 — 2015

- Advise, mentor, mediate, and supervise 63 students on 3 residential floors, providing support for issues regarding mental/physical health, alcohol/drug use, diversity, and academic performance. Create and implement educational and social programs to build community in residence hall.

Columbia University STRIVE, New York, NY

College Advisor and Mentor

2011 — 2015

- Mentor low-income NYC students with Sickle Cell Anemia in weekly group sessions that provide academic assistance, peer support, and disease management education. Coordinate long and short-term college-prep strategies for 6-12th grade students.
