Matthew E. Levine

Contact Information	California Institute of Technology Computing and Mathematical Sciences 1200 E. California Blvd. M/C 305-16 Pasadena, CA 91125	*E-mail:* mlevine@caltech.edu *Skype:* mattlevine3

Research Interests

Machine learning, data assimilation, dynamical systems, Bayesian statistics, bio/physiologic modeling

Education

California Institute of Technology, California, CA, USA   **2018 — Present**
Computing + Mathematical Sciences, Ph.D. Student (3rd year)
Adviser: Dr. Andrew Stuart

Columbia University, New York, NY, USA   **2011 — 2015**
B.A. Biophysics, May 2015

SIT World Learning Study Abroad, Arica, Chile   **Fall 2015**
Program: Public Health, Traditional Medicine, and Community Empowerment

Awards

- **National Science Foundation Graduate Research Fellowship**   **2020**
- **Best Paper of the Year on AI in Health**   **2019**
  International Medical Informatics Association Yearbook of Medical Informatics
  Albers *et al.* Mechanistic machine learning: how data assimilation leverages physiologic knowledge using Bayesian inference to forecast the future, infer the present, and phenotype. JAMIA 2018.
- Finalist (1 of 5, Team T2D2), Amazon Alexa Diabetes Challenge   **2017**
- Poster Competition Winner, Data Science Institute, Columbia University   **2016**
- Summer Chemistry Fellow, Société de Chimie Industrielle   **2012**
- National Merit Scholar, Johnson & Johnson Consumer Companies   **2011**

Research Experience

California Institute of Technology, Pasadena, CA, USA

Graduate Student, Computing + Mathematical Sciences   **Fall 2018 to Present**
Adviser: Dr. Andrew Stuart

- Designing physics-based data-driven modeling framework for predicting dynamical systems that addresses markovian and non-markovian model inadequacies in both discrete and continuous time.
- Implemented novel state-space constraints in an Ensemble Kalman Filter, which performs a constrained state-update via quadratic optimization (*Inverse Problems 2019*).
- Developing modeling and forecasting methodologies for glucose prediction in critically ill patients in Neurological Intensive Care Units.

Columbia University, New York, NY, USA

Research Associate, Biomedical Informatics   **June 2015 to August 2018**
Advisers: Dr. George Hripcsak, Dr. David Albers, Dr. Lena Mamykina

- Implemented and validated non-linear stochastic filtering, Bayesian inverse framework, model averaging, and optimization methods for a *currently deployed personalized blood glucose prediction mobile application* for people with type 2 diabetes.
- Collaborated with social scientists and mobile app developers to ensure successful deployment of the data assimilation technology into mobile applications for use among patients in clinical research studies.

- Developed and evaluated novel methods for time series analysis of non-stationary large-scale electronic health record data, including temporal reparameterizations, linear temporal interpolations, and granger causality. (Levine *et al.* JBI 2018)
- Developed open-source code for evaluating information loss and gain when mapping between medical terminologies, which was shared with an international consortium of medical record stakeholders (totaling over 1 billion patient records)
- Mentored two first-year graduate students in "behavioral phenotyping" projects that used machine learning and self-monitoring data to make personalized recommendations regarding nutrition, sleep, and activity patterns, as well as visually represent these data such that care providers can understand and recognize intra-patient patterns.
- Contributed talks to weekly Data Mining reading group, and presented on classical results from signal processing, machine learning, informatics, and diabetes physiology

TEACHING
EXPERIENCE

Teaching Assistant, Data-driven modeling of dynamical systems (CMS 270)
Taught by Dr. Krithika Manohar at Caltech   **Fall 2020**
- Graduate special topics course covering state-of-the-art methods in data-driven modeling.
- Supported and evaluated students in designing and implementing novel research projects.
- Delivered guest lecture surveying existing methods for learning model error in ODEs.

Head Teaching Assistant, Machine Learning and Data Mining (CS 155)
Taught by Prof. Yisong Yue at Caltech   **Winter 2020**
- Graduate/undergraduate course (enrollment of 180 students) covering a broad range of machine learning techniques, with focus on both implementation and theory.
- Coordinated a team of 12 undergraduate TAs to prepare, provide aid for, and grade all homework assignments, projects, and exams.

INVITED
WORKSHOPS

Mathematisches Forschungsinstitut Oberwolfach, Oberwolfach, Germany
Invited Participant, *Data Assimilation: Mathematical Foundation & Applications* **April 2020**

Berlin Mathematical School, Zuse Institute, Berlin, Germany   **August 2019**
Participant, *Summer School: The Mathematics of Deep Learning*
- Studied modern theory of neural networks, including their generalizability, expressivity, and applications. Invoked tools from stochastic analysis, dynamical systems, and control to understand neural network properties.
- Poster: mechRNN—embedding mechanistic dynamics within recurrent neural networks.

Alan Turing Institute, London, UK   **December 2018**
Data Study Group Participant, *MedImmune Challenge — Machine learning for enhanced understanding in cell culture bioprocess development*
- Developed supervised time-series forecasting approach for predicting drug production quantity in bioreactors.

North Carolina State University, Raleigh, NC, USA   **July 2016**
Research Training Group in Mathematical Biology
Participant, *Tutorial Workshop on Parameter Estimation for Biological Models*
- Covered estimation of model parameters and associated uncertainties, parameter identifiability, and uncertainty quantification. Lectures were accompanied by hands-on MATLAB exercises.
- Poster: Online state and parameter estimation for personalized, nutrition-based, real-time glucose forecasting in Type 2 Diabetes. Levine ME, Albers DJ, Stuart A, Mamykina L.

Mathematisches Forschungsinstitut Oberwolfach, Oberwolfach, Germany
Participant, *Data Assimilation Seminar: The Mathematics of*   **May 2016**
Connecting Dynamical Systems to Data
- Introduction to mathematical and algorithmic foundations of modern data assimilation methods with Bayesian underpinnings.
- Poster: Data Assimilation for Personalized Blood Glucose Forecasting for People with Diabetes. Levine ME, Albers DJ, Stuart A.

SERVICE &
OUTREACH

Caltech Freshman Summer Research Institute, Pasadena, CA
Graduate Student Mentor   **Summer 2020**

- Mentored an incoming undergraduate interested in coding and applied/theoretical math.
- Guided the student through an exploration of the logistic map in order to illustrate accessible key principles in programming, applied modeling, and dynamical systems theory.

Mission Unstoppable (TV Show), Los Angeles, CA

STEM communication consultant **2019**
- Collaborated with a TV series dedicated to inspiring young girls to pursue STEM careers.
- Using personal and professional connections to highlight women and minority voices in STEM.
- Drafting accessible explanations of fun physical phenomena
- Collaborate with creative content developers to ensure segments are both captivating and accurate

New York Academy of Sciences, New York, NY

STEM mentor **March 2017 to June 2017**
- Led a group of seventh-graders at KIPP STAR College Prep Middle School in a once-a-week afterschool exploration of computer programming using a curriculum adapted from PlayCodeMonkey.org.

Observational Health Data Sciences and Informatics (OHDSI)

Symposium Planning Committee **2015 — 2016**
- Supported symposium scheduling, communications, logistics, and funding outreach initiatives

Columbia University Office of Residential Programs, New York, NY

Residential Advisor **2012 — 2015**
- Advise, mentor, mediate, and supervise 63 students on 3 residential floors, providing support for issues regarding mental/physical health, alcohol/drug use, diversity, and academic performance. Create and implement educational and social programs to build community in residence hall.

Columbia University STRIVE, New York, NY

College Advisor and Mentor **2011 — 2015**
- Mentor low-income NYC students with Sickle Cell Anemia in weekly group sessions that provide academic assistance, peer support, and disease management education. Coordinate long and short-term college-prep strategies for 6-12th grade students.
